

## TOUCHLESS VITA THE eHEALTH SOLUTION FOR CONTACT-FREE PATIENT MONITORING

### SECURE, NETWORKING CARE

*TouchlessVita* is a comprehensive solution for accurate vital data collection and analysis. From using sensors via connectivity and processing up to dashboard visualization, exceet supports in its technical realization, cross-sector implementation as well as integration into existing system architectures with special focus on the security of networking solutions.

### POTENTIALS AT A GLANCE

Continuous measurement and monitoring of vital data is an important factor in simplifying and accelerating medical processes for patient care, diagnostics and therapy. With *TouchlessVita*, these data are gathered in a securely and particularly convenient way. An innovative sensor obtains important vital data through a single device containing state-of-the-art MEMS technology and smart software algorithms – non-obtrusive, without direct contact with the patient.

#### POTENTIALS

- Not Perceptible
- High Hygiene Standard
- Wireless Comfort
- Maximum Efficiency
- Easy Integration
- Individual Integration

#### USE CASES

- Patient monitoring
- Vital monitoring
- Intermediate care
- Stay control
- Patient tracking
- Dementia monitoring
- Stay control
- Ambulant care

#### ADVANTAGES

- Improvement of patient security
- Enhancement of care quality
- Optimization of process flows
- Relief of personnel/relatives
- Hygienic as no patient contact
- Ideal for the care of patients with dementia

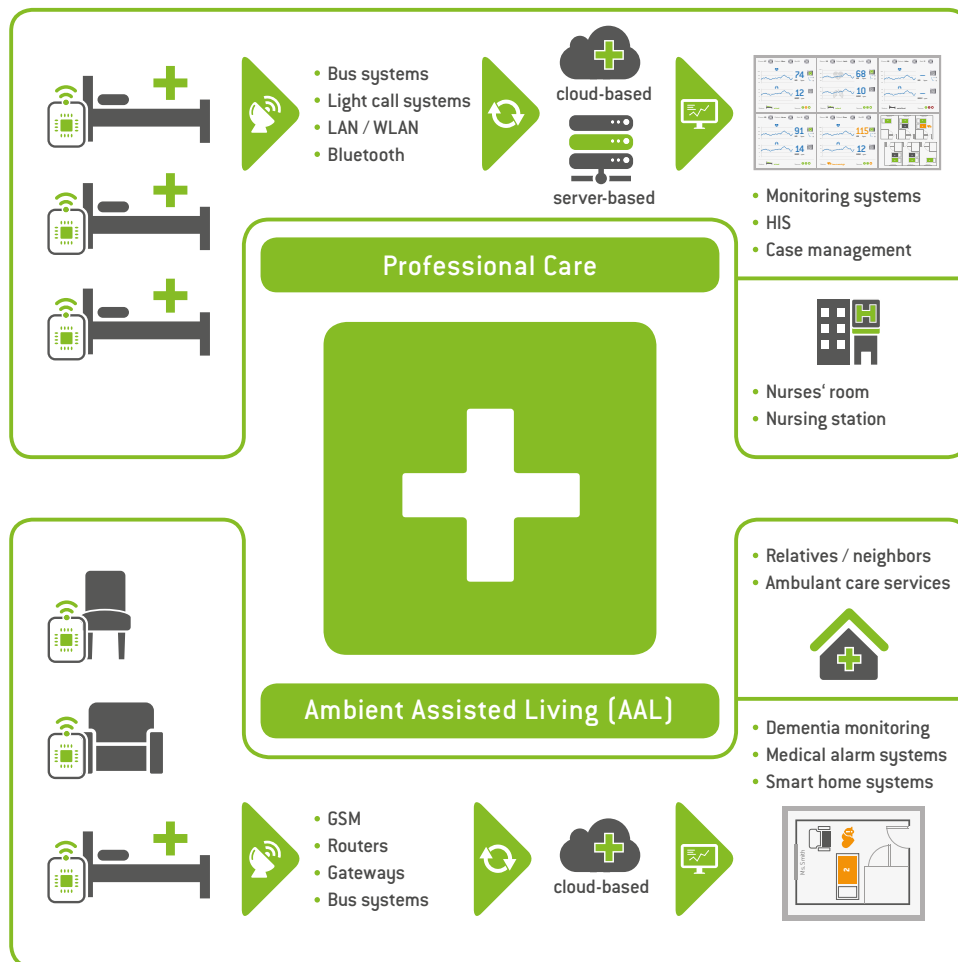

## REMOTE OR LOCAL

*TouchlessVita* is ready for local and remote usage and is thus suitable for applications in the fields of home care and professional care. Contact-free sensor technology combined with individually applicable communication and information technology and integratable security mechanisms facilitates the efficient and secure networking of all participating actors, systems, and processes.

Besides improving the quality and security of treatment, *TouchlessVita* supports in optimizing processes of patient care and, with regard to clinics, hospitals, and ambulant care services, reducing costs.

## A COHESIVE SOLUTION WITH THE OPPORTUNITY FOR ADD-ONS

*TouchlessVita* is designed to make daily nursing routines in home and professional care more convenient and economic and thus release completely new synergies. Besides the technical implementation, exceet expands the solutions with relevant application scenarios. Hence exceet supports in identifying further possible participants and their integration into the total ecosystem.
