

exceet at the Security of Things World Conference 2018 in Berlin

- single source for end2end security solutions
- secure edge and fog computing

Düsseldorf, July 3, 2018 – exceet Secure Solutions presented at the three-day Security of Things World Conference from July 1 to 3, 2018 in Berlin the latest developments in IoT and edge computing. In addition, exceet Secure Solutions Managing Director Christian Schmitz held a presentation entitled “[From Edge to Fog to Cloud – Security in Times of Decentralized Networks – How we build the Internet of Trust](#)”.

The steadily expanding flood of data poses ever greater challenges for business. Strong partners from the security sector provide support and advice to address these challenges. Together with its partner Interxion, exceet Secure Solutions offers end2end security solutions that protect edge and fog computing environments as well as computing centers and public clouds.

“exceet connect Encrypt lets companies develop IoT applications without compromising on security and compliance”, says Christian Schmitz. “We rely on tried, proven and certified hardware modules that can be used with all leading public cloud providers. Since these devices are operated at Interxion’s state-of-the-art computing centers, all major public cloud providers can be reached in extremely short latency times”, Schmitz adds.

This makes exceet Secure Solutions a leading innovator and source of support in developing secure Industry 4.0 environments, giving clients the right level of data security for each and every digital use case.

exceet Secure Solutions Managing Director Christian Schmitz and Patrick Lastennet, Director of Marketing and Business Development at Interxion, spoke at the Security of Things World during the session "[From Edge to Fog to Cloud – Security in Times of Decentralized Networks - How We Build the Internet of Trust](#)".
